III. CLAIM AMENDMENTS

1. (Currently Amended) A system for controlling by a terminal at least a first ~~(3a)~~ and a second remote mailbox ~~(3b)~~ located in at least one e-mail server ~~(2a, 2b)~~, ~~in a terminal (1), characterized in that~~comprising means for arranging an at least partly simultaneous connection between the terminal ~~(1)~~ and said e-mail server ~~(2a, 2b)~~ maintaining said first remote mailbox ~~(3a)~~, and between the terminal ~~(1)~~ and said e-mail server ~~(2a, 2b)~~ maintaining said second remote mailbox ~~(3b)~~, ~~at least partly simultaneous connection (PDP1, PDP2) is arranged to be set up, whereinand~~ said terminal comprising means for controlling said remote mailboxes ~~(3a, 3b) are arranged to be controlled by means of the terminal (1)~~ substantially simultaneously by means of said connections ~~(PDP1, PDP2)~~.

2. (Cancelled)

3. (Currently Amended) The system according to claim 1, ~~characterized in that preferably~~comprising an e-mail program ~~is arranged~~ to be used for controlling said remote mailboxes ~~(2a, 2b)~~, which e-mail program is provided with the ~~possibility~~capability to control several remote mailboxes substantially simultaneously, and in which each remote mailbox is provided with a unique identification ~~(7), such as an icon or a name~~.

4. (Currently Amended) The system according to claim 3, in which a notification ~~(10)~~ of an e-mail message ~~(9)~~ that has

arrived in one of said remote mailboxes ~~(3a, 3b)~~ is arranged to be produced for ~~the~~a user, ~~characterized in that~~wherein said notification is arranged to be provided with a unique identification ~~(7)~~ of that remote mailbox ~~(3a, 3b)~~ to which the e-mail message ~~(9)~~ has arrived.

5. (Currently Amended) The system according to claim 3, in which the user in the e-mail program is provided with the ~~possibility~~capability to formulate and send e-mail messages ~~(9)~~, ~~characterized in that~~wherein the e-mail program is adapted to select the e-mail address of the user, and to ~~be attached~~attach the selected e-mail address of the user to the e-mail message ~~(9)~~ to be transmitted ~~is arranged to be selected in the e-mail program~~.

6. (Currently Amended) The system according to claim 3, in which the user in the e-mail program is provided with the ~~possibility~~capability to reply to the e-mail messages ~~(9)~~ that have arrived, ~~characterized in that~~wherein the system comprises means for attaching by default the address of the remote mailbox ~~(3a, 3b)~~ to which the e-mail message ~~(9)~~ to be answered has arrived~~, is arranged to be attached~~ to ~~the~~a reply message as an address of the sender of the reply message.

7. (Cancelled)

8. (Currently Amended) A method for controlling at least two remote mailboxes ~~(3a, 3b)~~ located in at least one e-mail server ~~(2a, 2b)~~, in a terminal ~~(1)~~, ~~characterized in that~~the method

comprising establishing an at least partly simultaneous connection between at least two said e-mail servers ~~(2a, 2b)~~ maintaining the remote mailboxes ~~(3a, 3b)~~ and the terminal ~~(1)~~, ~~an at least partly simultaneous connection (PDP1, PDP2) is established, whereinand controlling~~ said remote mailboxes ~~(3a, 3b) are controlled~~ by means of the terminal ~~(1)~~ substantially simultaneously by means of said connections ~~(PDP1, PDP2)~~.

9. (Currently Amended) The method according to claim 8, ~~characterized in that~~comprising using ~~the terminal is~~ a wireless communication device as said terminal.

10. (Currently Amended) The method according to claim 8, ~~characterized in that~~comprising using an e-mail program ~~is preferably used~~ for controlling said remote mailboxes ~~(2a, 2b)~~, in which e-mail program it is possible to control several remote mailboxes substantially simultaneously, and in which each remote mailbox has its own unique identification ~~(7)~~ such as an icon or a name.

11. (Currently Amended) The method according to claim 10, in which, when a new e-mail message ~~(9)~~ arrives in any of said remote mailboxes ~~(3a, 3b)~~, the method comprises forming a notification ~~(10)~~ of the e-mail message ~~(9)~~ that has arrived ~~is produced~~ for ~~the~~a user, ~~characterized in that~~ and providing said notification ~~is provided~~ with a unique identification ~~(7)~~ of that remote mailbox ~~(3a, 3b)~~ to which the e-mail message ~~(9)~~ has arrived.

12. (Currently Amended) The method according to claim 10, in which in the e-mail program the user can formulate and send e-mail messages ~~(9)~~, ~~characterized in that~~ wherein the method comprises selecting in the e-mail program the e-mail address of ~~the~~a user and attaching the selected e-mail address of the user ~~to be attached~~ to the e-mail message ~~(9)~~ to be transmitted ~~is selected in the e-mail program~~.

13. (Currently Amended) The method according to claim 10, ~~in which~~comprising replying in the e-mail program by ~~the~~a user ~~can reply~~ to the e-mail messages ~~(9)~~ that have arrived, ~~characterized in that~~and attaching by default the address of the remote mailbox ~~(3a, 3b)~~ to which the e-mail message ~~(9)~~ to be answered has arrived, ~~is attached~~ to ~~the~~a reply message as an address of the sender of the reply message.

14. (Currently Amended) The method according to claim 8, ~~characterized in that the~~comprising a wireless terminal ~~(1) communicates~~communicating with the GPRS system, and ~~establishes~~establishing said connections ~~(PDP1, PDP2)~~ to the e-mail servers ~~(2a, 2b)~~ by using the PDP connections of the GPRS system.

15. (Currently Amended) A terminal ~~(1)~~ which comprises means ~~(14, 16)~~ for controlling at least a first ~~(3a)~~ and a second remote mailbox ~~(3b)~~ located in at least one e-mail server ~~(2a, 2b)~~, ~~characterized in that the terminal (1) comprises~~ means ~~(14)~~ for establishing at least partly simultaneous connections ~~(PDP1, PDP2)~~ between the terminal ~~(1)~~ and said e-mail server ~~(2a, 2b)~~

maintaining the first remote mailbox ~~(3a)~~, between the terminal ~~(1)~~ and said e-mail server ~~(2a, 2b)~~ maintaining the second remote mailbox ~~(3b)~~, and means ~~(16, 17, 18)~~ for controlling said at least two remote mailboxes ~~(3a, 3b)~~ substantially simultaneously by means of said connections ~~(PDP1, PDP2)~~.

16. (Cancelled)

17. (Currently Amended) The terminal ~~(1)~~ according to claim 15, ~~characterized in that~~comprising an e-mail program ~~is preferably arranged~~ to be used for controlling said remote mailboxes ~~(2a, 2b)~~, which e-mail program is provided with the ~~possibility~~capability to control several remote mailboxes substantially simultaneously, and in which each remote mailbox is provided with a unique identification ~~(7)~~, such as an icon or a name.

18. (Currently Amended) The terminal ~~(1)~~ according to claim 17, ~~which comprises~~comprising means ~~(18, 19)~~ for producing a notification ~~(10)~~ of an e-mail message ~~(9)~~ that has arrived in one of said remote mailboxes ~~(3a, 3b)~~ for ~~the~~a user, ~~characterized in that~~and means for providing said notification ~~is arranged to be provided~~ with a unique identification ~~(7)~~ of that remote mailbox ~~(3a, 3b)~~ to which the e-mail message ~~(9)~~ has arrived.

19. (Currently Amended) The terminal ~~(1)~~ according to claim 17, ~~which comprises~~comprising means ~~(16, 17)~~ for formulating e-mail messages ~~(9)~~ and means ~~(14)~~ for transmitting e-mail messages,

~~characterized in that~~wherein said e-mail program is adapted to select the e-mail address of ~~the~~a user, and to ~~be attached~~attach the selected e-mail address of the user to the e-mail message ~~(9)~~ to be transmitted ~~is arranged to be selected in the e-mail program~~.

20. (Currently Amended) The terminal ~~(1)~~ according to claim 17, ~~which comprises~~comprising means ~~(14, 17)~~ for answering the e-mail messages ~~(9)~~ that have arrived, ~~characterized in that~~and means for attaching by default the address of the remote mailbox ~~(3a, 3b)~~ to which the e-mail message ~~(9)~~ to be answered has arrived, ~~is arranged to be attached~~ to ~~the~~a reply message ~~as a default value~~.

21. (Currently Amended) The terminal ~~(1)~~ according to claim 15, ~~characterized in that it is arranged~~adapted to be used at least in a mobile communication network according to the GPRS system, which comprises means for establishing PDP connections, and that the terminal ~~(1)~~ is arranged to set up said connections ~~(PDP1, PDP2)~~ to the e-mail servers ~~(2a, 2b)~~ by using the PDP connections of the GPRS system.

22. (New) A GPRS system comprising means for establishing PDP connections, means for controlling by a terminal at least a first and a second remote mailbox located in at least one e-mail server, comprising means for arranging at least partly simultaneous PDP connection between the terminal and said e-mail server maintaining said first remote mailbox and between the terminal and said e-mail server maintaining said second remote

mailbox, and said terminal comprising means for controlling said remote mailboxes substantially simultaneously by mean of said PDP connections.

23. (New) A wireless communication device comprising means for controlling at least a first and a second remote mailbox located in at least one e-mail server in a system comprising means for arranging at least partly simultaneous connection between the wireless communication device and said e-mail server maintaining said first remote mailbox and between the wireless communication device and said e-mail server maintaining said second remote mailbox, and said means for controlling at least a first and a second remote mailbox being adapted to control said at least first and second remote mailboxes substantially simultaneously by means of said connections.
